# Empowering Youth: The Prague Initiative for HIV/AIDS Prevention in Schools by Ukrainian Educators – A Collaborative Approach

The screenshot shows the homepage of the SZU (Státní zdravotní ústav) website. The main banner features an aerial view of a residential area with the text 'Staráme se o zdravé Česko'. Below the banner, there's a search bar and a blue button labeled 'VYHLEDÁT'. On the left sidebar, there are links for 'Témata zdraví a bezpečnosti', 'Odborné centra a pracovníky', 'Věda, výzkum, vzdělávání', 'Projekty', 'Publikace - Data', 'Knihovna', 'Služby', and 'Kontakt'. Social media icons for Facebook, Twitter, and Instagram are also present.

The screenshot shows a news article from the SZU website. The title is 'Naučit mladé lidi chránit se proti nákaze HIV. To je cíl pokračujícího dvojjazyčného projektu HROU PROTI AIDS'. The date is 26. DUBNA 2024, and the author is TISKOVÁ ZPRÁVA. The text discusses the continuation of a bilingual project aimed at teaching young people how to protect themselves from HIV. It mentions the collaboration with the World Health Organization (WHO) and the Státní zdravotní ústav (SZU). The text is in Czech.

**Ve spolupráci se Světovou zdravotnickou organizací (WHO) navrhoje Státní zdravotní ústav (SZU) na úspěšný dvojjazyčný projekt z let 2022-2023. Projekt s názvem Empowering Youth: The Prague Initiative for HIV/AIDS Prevention in Schools by Ukrainian Educators – A Collaborative Approach: Game against AIDS / Hra proti AIDS realizují na území hlavního města Prahy ukrajští lektori pro ukrajinské žáky v rodiném jazyce. Cíl zůstává stejný – naučit mladé lidi chránit se proti nákaze HIV.**

**V uplynulých letech ruší proškolení odbornici nováčků s osvětou o prevenci školy v několika krajích ČR. Součástí projektu jsou i kreativa vidin, které jsou samozřejmě v české i ukrajinské verzi, čímž projekt reaguje na integraci žáků z Ukrajiny do českého vzdělávacího systému.**

**Slovenský ředitel Global Programme on AIDS protisklid jednou způsob, jak ochránit naše děti před AIDS, je doložit, aby učili ochránit samy seba.**

<b>N of GPs for, adults, for children and gynecologists waiting rooms where the quiz is administered</b>	<b>1100</b>	<b>1100</b>	<b>100</b>

# *Overall Goal*

**"By the end of the project period, measured from April to June 2024, the initiative will achieve a **20% increase** in the comprehensive understanding of HIV/AIDS among Ukrainian pupils and students in Prague, evidenced through pre- and post-assessment surveys.**

This will encompass knowledge pertaining to HIV/AIDS transmission, available testing options within the Czech Republic, treatment modalities, living with HIV/AIDS, and awareness of other sexually transmitted infections (STIs).

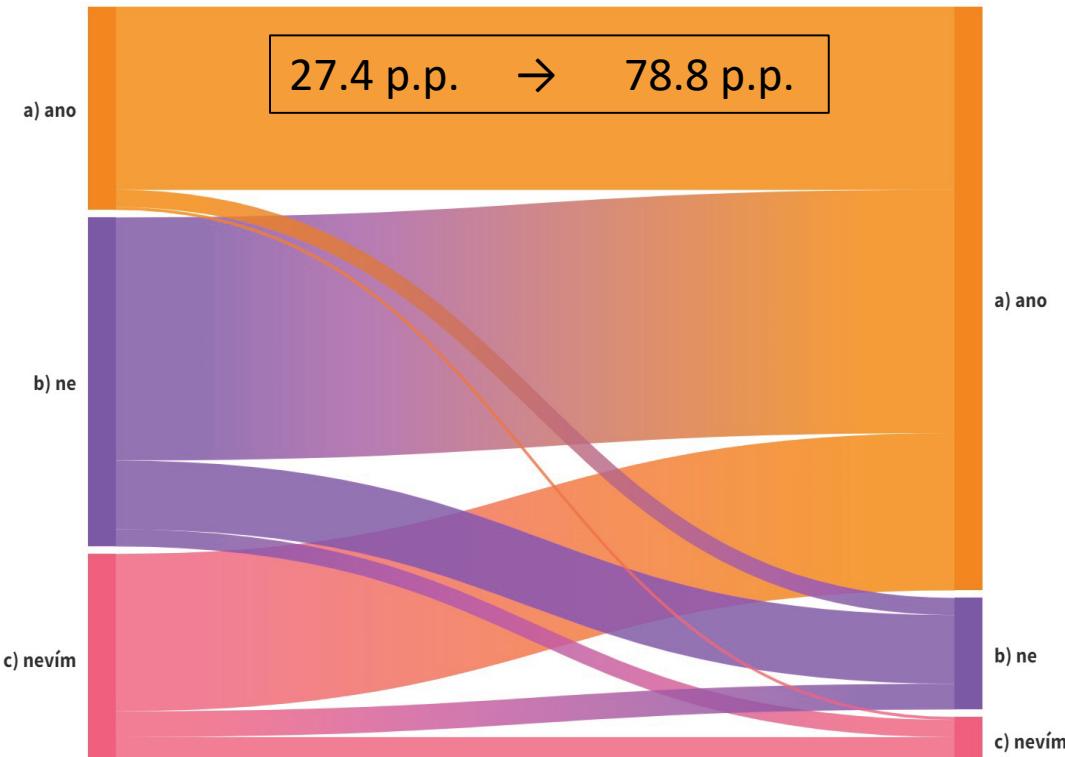

Additionally, the project seeks to foster positive attitudes towards HIV/AIDS and individuals living with the virus among the targeted demographic, as measured by attitudinal surveys administered before and after the intervention."

# *Fulfillment of the overall goal*

- One of the main goals we set was **to improve the knowledge of project participants by 20 percentage points.**
- **On average**, we achieved an improvement of **30.32 percentage points.**
- The answers to some questions were good and an improvement of 20 percentage points was not possible.
- In some cases, **there was a change for the better by as much as 51.4 percentage points.** The result is all the more significant because **it was a change of attitude towards people living with HIV in question # 13 – "Would you buy fresh vegetables from an HIV-positive seller?" – there was a change of "YES" before and after the completion of the project from 27.4 percentage points to 78.8 percentage points.**
- **To question #14 - "Do you think that children who are HIV positive should be able to go to school together with children who are HIV negative?" – in this event the change was from 38.6 percentage points before the start of the project to 78.0 percentage points after its completion.**
- **This shows that improving knowledge leads to an immediate change in attitudes and it was the goal the project sought to achieve.**

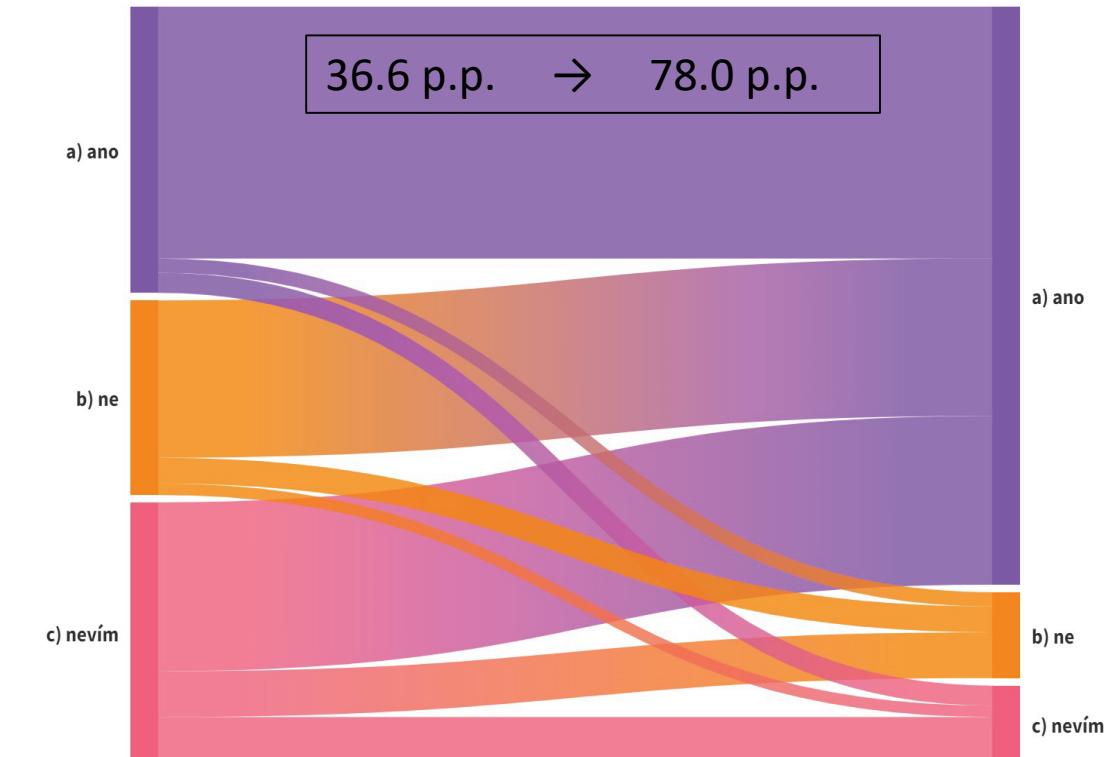

### 13. Koupili byste si čerstvou zeleninu od HIV pozitivního prodejce?

"Would you buy fresh vegetables from an HIV-positive seller?"

### 14. Myslíte si, že děti, které jsou HIV pozitivní, by měly mít možnost chodit do školy společně s dětmi, které jsou HIV negativní?

"Do you think that children who are HIV positive should be able to go to school together with children who are HIV negative?"

THANK YOU
